

Anand Kumar Das

Software Engineer

anandkumardas113@gmail.com | 7297993703 | Dhanbad, Jharkhand

[LinkedIn](#) | [GitHub](#) | [LeetCode](#)

Professional Summary

Software Engineer skilled in Java, JavaScript, React, SQL, MongoDB, and Git, with experience in software development, backend development, web application development, and database management. Experienced in developing scalable applications, building features, integrating APIs, optimizing database operations, debugging software issues, and implementing maintainable code. Strong foundation in Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), and full-stack development, with a focus on delivering efficient and reliable software solutions.

Education

BIT Sindri, Dhanbad, Jharkhand

2025 – 2029

Bachelor of Technology (B.Tech.) in Computer Science and Engineering

First-Year CGPA: 8.72/10

SSNMS Sijua, Dhanbad, Jharkhand

2025

Class XII – ISC

Percentage: 89.20%

Technical Skills

Programming Languages: Java, JavaScript, SQL

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, JavaScript

Backend Development: Node.js, Express.js, REST APIs, MERN Stack

Databases: MongoDB, SQL

Tools & Version Control: Git, GitHub

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, API Integration, Debugging

Technical Projects

MedEase – Doctor & Patient Healthcare Platform

[GitHub](#)

Full-Stack Web Application | Academic Team Project | Team Size: 4

- Developed a full-stack healthcare platform using **HTML, JavaScript, Tailwind CSS, PHP, and MySQL** to facilitate doctor discovery and patient management through structured doctor and patient profiles.
- Implemented **user authentication and authorization** with email verification codes, mobile OTP verification, country-code validation, and **role-based access control (RBAC)** for doctor and patient accounts.
- Designed and implemented a **Unique Doctor UID** generation and verification workflow with database-backed verification status for unique doctor identification.
- Developed **form-level and server-side validation** including duplicate email/mobile detection, input validation, authentication checks, and comprehensive registration and login error handling.
- Implemented **doctor specialization standardization and spelling correction** to maintain consistent healthcare data and improve doctor search and profile management.
- Integrated **REST APIs** and MySQL database operations for authentication, doctor verification, profile management, and user data handling.

Smriti Setu – AI-Based Cognitive & Memory Assistance Platform

SIH 2026

HealthTech | Team Project

- Designed an AI-enabled platform for elderly users and caregivers with adaptive cognitive games for memory, attention, concentration, and pattern recognition.
- Integrated multilingual voice assistance using **LLM/NLP, STT, and TTS** to improve accessibility and user engagement.
- Designed caregiver features including **activity monitoring, reminders, alerts, performance tracking, and personalized memory support**.
- Proposed an **offline-first architecture** with local storage and automatic synchronization for low-connectivity environments.

Portfolio Website

- Built a responsive portfolio website using React.js, HTML5, CSS3, and Tailwind CSS to showcase projects, technical skills, and achievements.
- Implemented responsive UI components and structured navigation for improved usability across desktop and mobile devices.

Core Strengths

Problem Solving		Object-Oriented Programming		Database Management		Debugging		Team
Collaboration		Software Development
